FINDS MINERAL PRODUCTS WITH FINE PROSPECTS

C. G. Bockus, Back From Inspection Trip, Tells of Company's Situation

Returning on the Matsonia Tuesday from an inspection of the three properties in California of the Mineral Products Company, Charles G. Bockus, who handled the stock-selling campaign here and is largely interested in the concern, is enthusiastic and more over the present progress and future prospects.

"Both in the construction of the railroad which will carry out the large mineral deposits, and in the uncovering of additional deposits, the company is 'making good' on the promises to investors, he points out.

"The railroad contract, about which there appears to have been some local misunderstanding, is on a strictly yardage basis—so much for dirt, so much for dirt and rock, and so much for rock. H. G. Ginn, our assistant engineer, believes that the road will run under the estimated cost and the construction is now ahead of time. H. A. Edson, the chief engineer, estimates the construction time at six months, if work progresses as favorably as it is now doing, which will complete the road, 25 miles long, by July 1.

"After an examination made by John Watt, H. B. Giffard and myself of Honolulu, W. T. Jones, the original locator of the properties, and Mr. Ginn, we were greatly pleased with the showing of the silica deposits. This was our first trip to the properties, made from Patterson, and on account of weather conditions was shortened.

"The silica deposits are more than satisfactory. There is a large tonnage on the surface, 99.7 per cent pure, the deposits more than bearing out the original estimates of 150,000 tons, easily mined. The grade of the hill lends readily to economical railroad shipment. The silica deposit is a out 13 miles from Patterson. Two miles further are the magnesite deposits, on the eastern side of the hill recently opened, previous development work having been done on the western side. We found all the statements and estimates previously made fall far below the actual facts. Instead of 2,500,000 tons, it is safe to say that there are 10,000,000 tons here.

"Our next trip was from San Francisco to Livermore and back by auto to the magnesite properties of the company on the upper end of the claims. We found practically an unlimited supply of magnesite, estimates being that 650,000 to 750,000 tons are in sight. There has been uncovered 21 miles out from Patterson deposits of chrome iron ore. The engineer estimates that 100,000 to 150,000 tons are on the surface and can be developed at once and shipped out as soon as the railroad reaches that point, which will probably be in June.

"There is no necessity now for talk of dividends. The money is in hand to complete the railroad and when transportation is provided then there will be time enough to talk dividends."

FUNERAL SERVICES FOR HIGH CHIEF HERE TODAY

Funeral services for the late High Chief Louis Kaloaiwaia Kahoalii were to be held this afternoon from the family residence, 1735 Liliha street, interment to be in Kawaiahaeo cemetery. Kahoalii, who died last Tuesday afternoon, was a brother of the late High Chiefess Grace K. Kahoalii and a cousin of the late Queen Emma. He was born at Waialeale, this island, on September 26, 1843, and is survived by a widow.

A statement issued by the Austrian Ambassador at Berlin says that all reports of illness of Emperor Franz Josef are false.

French newspapers print an offer of 25,000 francs to any French aviator who brings down a Zeppelin within the French lines, and 10,000 francs to any gunner in the anti-aircraft batteries who obtains the same results with shells.

CARNIVAL HEADS LAUD WILDER FOR WORK OF SCOUTS

Pass Resolutions of Appreciation and Urge Recognition and Support for Boys

James A. Wilder and the local Boy Scouts have been given special recognition and high praise. In a resolution passed by the Carnival directors yesterday afternoon hearty thanks are given for the big share which the scouts took in the recent Carnival. The resolution follows, in full:

"Whereas, The Boy Scouts of America in Hawaii, under the leadership of Special Field Commissioner James A. Wilder, have very materially assisted in making the 1916 Carnival a success; and

"Whereas, Their display during Carnival week of an uncommon and high degree of discipline, efficiency and sense of duty has been the source of pleasure to the public and a topic of favorable comment among all those who had the opportunity to observe their work;

"Be it resolved, By the directors of the Mid-Pacific Carnival, Ltd., at the meeting assembled, that we express to the Boy Scout organization of this territory, through James A. Wilder, sincere thanks for their co-operation and help during Carnival week, and the hope that they may find that recognition and support among the citizens of this territory which the educational value of their methods and the great importance of their work in the character molding of the coming generations so strongly deserve.

"Be it further resolved, That this resolution be spread on the minutes of this meeting, that a copy thereof be transmitted to James A. Wilder and that its tenor be made known to the public press."

BRIEF BITS ON MEN, PLANS AND EVENTS AT HONOLULU'S "Y"

The educational committee will meet on Friday evening at 7:30 at Cooke Hall.

Judge Alexander Larnach gave the first of 10 lectures before the commercial law class of the Y. M. C. A. night school last evening at 8 o'clock.

Paul Steel will give an illustrated lecture at Cooke Hall this evening at 8 o'clock. His slides will show many of the interesting beauty spots of the Rocky Mountain country.

Glenn E. Jackson was chosen leader of the newly organized Triple A club at a meeting Tuesday evening. This club is composed of high school students and will take a prominent part in local athletics.

C. A. Pease, a member of Company I, Engineer, has been appointed an assistant in the physical department of the association. He was a former athlete in Oregon, and has announced that he will purchase his release from the army.

DELAYED BILLS MAKE CARNIVAL DIRECTORS SLOW WITH ESTIMATE

Because all bills are not yet in and the books have not been completed, it is impossible as yet to state the financial outcome of the recent Mid-Pacific Carnival, according to J. F. C. Hagens, president of the board of directors. Mr. Hagens says that it will probably be a week before it is possible to estimate the financial standing of the corporation.

HONOLULU PEOPLE GET INSTANT ACTION

Those who have used it in Honolulu are astonished at the INSTANT action of simple buckthorn bark, glycerine, etc., as mixed in Adler's-ka. Because it acts on BOTH lower and upper bowel, ONE SPOONFUL Adler's-ka relieves almost ANY CASE constipation, sour stomach or gas. It removes such surprising foul matter that a few doses often relieve or prevent appendicitis. A short treatment helps chronic stomach trouble. The Hollister Drug Company.—Adv.

MRS. LINDHOLM BEING SOUGHT BY SISTER

Is Mrs. Charles Lindholm in Honolulu? In the islands? Does anyone know where she is? Her sister, Mrs. Helen Sachs, 39 Howe street, Dorchester, Mass., has written to Governor Pinkham, asking him to aid her in finding Mrs. Lindholm. The governor has passed the task over to the newspapers.

Mrs. Sachs has not heard from her sister since she left her in Boston in 1899. At that time she started for Hawaii to join her husband, who was working on a sugar plantation somewhere in the islands. He was a Mason and had worked in the islands for some time.

A heavy loss of life is reported from the floods in Java.

PAN-PACIFICISTS HOLD DINNER IN STRANGE'S HONOR

Will Back New Japanese Weekly and Send Exhibits to Fair at San Diego

How to cement still better the bonds of race fellowship among the people of the Pacific was discussed last night at a dinner of the Pan-Pacific Club at which Harry L. Strange, one of the directors, was the guest of honor. The dinner was held at the Outrigger Club, Waikiki.

It was decided, among other things, to back as an organization a Pan-Pacific weekly newspaper, printed in Japanese, which will probably be started about the middle of March under the editorship of T. Hattori and G. Nambo, formerly of the Hawaii Shippo.

Acting Consul H. Arita said that Japan would be glad to see a great commercial museum established in Honolulu, and was sure his country would do its part in supplying exhibits.

Mr. Strange suggested that a committee be formed to gather and forward an exhibit to the Pan-Pacific building in San Diego, which is to be opened March 15. Alexander Hume Ford stated that these exhibits would be returned to Honolulu at the close of the fair there, and that quarters had been secured for placing them.

Other speakers who offered suggestions were Jack London, Frank C. Atherton, L. W. de Vis Norton, Dr. Syngman Rhee, J. W. Baines, J. Korchnisky and Lorrin Andrews.

CITY TREASURER TELLS ROTARIANS OF PUBLIC WORK

City Treasurer Lloyd Conkling was the main speaker today at the weekly luncheon of the Rotary Club. His subject was "Spending the People's Money," and he told something of city financial machinery and something of the problems which face city officials. The program for the next four meetings was announced today as follows: March 9—"The 1917 Mid-Pacific Carnival"—Fred L. Waldron, president Chamber of Commerce of Honolulu.

March 16—"Our Salaried Partners"—Emil A. Berndt, manager W. W. Dimond & Co., Ltd.

March 23—"Our Stock Market"—Chas. G. Heiser, Jr., member Honolulu Stock and Bond Exchange.

March 30—"Our Friends in Prison"—Samuel W. Robley, executive officer Prison Aid Association.

EFFICIENCY METHODS IN Y. M. OFFICE WORK

Richard Whitcomb, membership secretary of the Y. M. C. A., has instituted a new system in the office of the association by applying some of the Harrington Emerson efficiency methods. Heretofore the relations between the front office and the secretaries at the head of the several departments hasn't been as close and systematic as desired. By means of a scheme of written memos and individual call boxes the secretaries are kept in immediate touch with all that affects their departments coming through the main office.

The most delicate fabrics

washed clean in the Thor

home laundry
machine with-
out the
slightest
injury.

There is one big reason for this valuable

feature—right principles of construction. The clothes are washed inside a polished, hard maple cylinder which revolves and reverses, forcing the hot, soapy water through the clothes, carrying all dirt and grime away. There can be no tearing because there are no corners or pegs for the clothes to catch upon and be pulled apart.

Every piece comes out fresh and pure and clean.

No scrubbing or wringing. Attaches to any light socket—motor does the work.
